

TotalTerminal

TotalTerminal is a plugin for Terminal.app which provides the Visor - a system-wide terminal window on a hot-key. TotalTerminal also adds additional minor features improving standard Terminal.app.

## Installation

* [Install SIMBL](http://www.culater.net/software/SIMBL/)
* Place Visor.bundle in ~/Library/Application Support/SIMBL/Plugins
* (Re)launch Terminal.app - You should now see the Visor window by selecting the hotkey from the menu bar
You can now trigger Visor with your hotkey from the menu bar
To hide Visor, you can either:
* re-trigger with your key-combo
* optionally you can click off the Visor window by clicking on Esc
* or you can also enable "Visor" in the menu bar by clicking on Esc+D to close it
* use the logout key-combo (control+D) to close it
* type "exit" in running shell to close it

#### Prerequisites:

* [SIMBL](http://www.culater.net/software/SIMBL/)
* ruby + rubygems
* XCode 3.0+
* zip/unzip

Installation steps:

git clone git://github.com/darwin/visor.git
cd visor
rake install
```

TotalTerminal is tested to work in MacOS 10.6 - 10.8.
