Installation

- * [Install SIMBL](http://www.culater.net/software/SIMBL/)
- * Place Visor.bundle in ~/Library/Application Support/SIMBL/Plugins
- * (Re)launch Terminal.app - You should now see a Visor window
- * Configure your keyboard trigger by selecting a hotkey from the Visor window

You can now trigger Visor with your hotkey from the Visor window

To hide Visor, you can either:

- * re-trigger with your key-combo
- * or you can also enable "Visor" in the System Preferences, clicking on the "Visor" tab and checking the "Visor" checkbox
- * use the logout key-combo (control+command+q) to close the Visor window
- * type "exit" in running shell to close it

Prerequisites:

- * [SIMBL](http://www.culater.net/software/SIMBL/)
- * ruby + rubygems
- * XCode 3.0+
- * zip/unzip

Installation steps:

```
git clone git://github.com/darwin/visor.git
cd visor
rake
```

TotalTerminal is a plugin for Terminal.app which provides Visor - a system-wide terminal window on a hot-key.

TotalTerminal also adds additional minor features improving standard Terminal.app.

Read more at <http://totalterminal.binaryage.com>

Minimal supported MacOS version is 10.6. TotalTerminal is tested to work in both Snow Leopard and Lion.
